

# Assignment Cover Sheet

Faculty of Science, Engineering and Built  
Environment

**NAME:** Allen Seyran \_\_\_\_\_

**STUDENT ID:** 213113764 \_\_\_\_\_

**UNIT CODE:** SIT313 \_\_\_\_\_

**ASSIGNMENT/PRAC No.:** Assignment 1 \_\_\_\_\_

**ASSIGNMENT/PRAC NAME:** Assignment 1 \_\_\_\_\_

**DUE DATE:** 16/08/2015 \_\_\_\_\_

## Plagiarism and collusion

---

Plagiarism occurs when a student passes off as the student's own work, or copies without acknowledgment as to its authorship, the work of any other person.

Collusion occurs when a student obtains the agreement of another person for a fraudulent purpose with the intent of obtaining an advantage in submitting an assignment or other work

## Declaration

---

I certify that the attached work is entirely my own (or where submitted to meet the requirements of an approved group assignment is the work of the group), except where work quoted or paraphrased is acknowledged in the text. I also certify that it has not been submitted for assessment in any other unit or course.

I agree that Deakin University may make and retain copies of this work for the purposes of marking and review, and may submit this work to an external plagiarism-detection service who may retain a copy for future plagiarism detection but will not release it or use it for any other purpose.

**DATE:** 16/08/2015 \_\_\_\_\_

An assignment will not be accepted for assessment if the declaration appearing above has not been duly completed by the author.

## Enhancement Feature

Within the website I created, there were multiple sections where I decided to enhance my work by adding a few different features. These features include a search bar, icons to the buttons, and a transition between pages. These features help improve the quality of the website by making it easier to use and visually appealing

### Search Bar:

The search bar has been added on three pages, these include the breakfast, lunch and dessert pages. Here we are able to search for a specific meal that the user was looking for. Once the user enters the text, all matching text will appear. Resulting in the meal the user was after.

### Icons:

The icons have been added to the home, back and review buttons. These are simply implemented to provide a visually appealing button. Rather than just having the text. Each button is accompanied by their respective icon that matches the text.

### Transition:

Once again, the transition has been added to improve the visual aspects of the website. Every time a link is pressed, the transition between pages will be a flow. This improves the way the website looks. Rather than just having the next page appear, the user will see the transition from one page to another.

To reiterate, these features help improve the quality of the website. Whether it be the efficiency or the visual aspect. By adding these enhanced features, the user will enjoy the use of the website and get the most out of it.
